

THRASS ACCREDITED CERTIFICATE, GAUTENG, SOUTH AFRICA 13-14 JAN, 2010

Very interesting. I am enthusiastic and excited to start implementing such a clever way of teaching.

Enjoyable and very informative. I look forward to implementing THRASS in the classroom. It was great having such a knowledgeable and dynamic lecturer as Laola. Wonderful system.

A brilliant and enriching programme and course. Can't wait to get started on and familiarized with it!

An amazing two days of learning. The knowledge gives me the confidence to REALLY start this new project, at our centre, with enthusiasm and a "new found knowledge" which I believe will only benefit all learners to the best.

Very much enjoyed. I am looking forward to implementing THRASS into my Gr R classroom.

Very beneficial. It was a privilege to be part of it. Laola you were outstanding and so full of energy. You certainly inspired us and we can't wait to get started. For me, THRASS is the first phonics programme that makes real sense! It's wonderful for kids to have such an amazing frame of reference. I am so excited.

Wow! Thank you for two intense and jam-packed days. The metacognitive aspects are the most powerful. The explicit cognitive aspects are so empowering for teachers and children. The fact that the same programme is used from Gr 0 to Matric is so real and reinforces the skills that need to be carried from year to year.

We have learned all that we wanted to learn and so much more. Teachers are able to go forward with in-depth knowledge of THRASS. Laola's enthusiasm is infectious. Our teachers cannot wait to begin. Thank you for your patience and your willingness to explain or digress when necessary.

Course material well presented.

Very informative and inspiring. Cannot wait to put it into action.

Good and excellent. It must be implemented in all schools. It is an aid to educators. I wish I could reverse my age to stay in education. Keep up the good work you are really dedicated to all nations of South Africa.

Well presented. Very good use of resources. Definitely a worthwhile course. Have previously done a course so it was nice to do a refresher course.

Lovely course. Learnt so much, will use the programme in my class. I am sure all areas will improve, especially speaking, reading and spelling.

A very informative, refreshing approach to Literacy, done by an inspirational lecturer. Perhaps instead of so much time spent on the lips and different sounds, we could have been shown different resources and ways to use them.

Very worthwhile course which inspired me to want to try it. Would like to have a practical session per grade to see how we can start it in a specific grade. We would love to have follow-up sessions.

Great workshop. More hands on activities would be really helpful. Excellent course.

The facilitator, Laola, was enthusiastic and well versed in her knowledge and presentation of the course. As a Grade 4 educator, doing this course has empowered me to understand how reading, writing and spelling the THRASS way is taught in the junior phase. This will enable me to carry the method through to the Grade 4's. It is a brilliant and easy way of teaching learners the basic skills of language. I will also apply the THRASS method to teaching my grandchildren!

Laola obviously knows the product well and her enthusiasm is contagious. I had an introduction elsewhere so I did have expectations that were met. I learnt a lot more and feel more confident to use it.
