

THRASS ONE-DAY FOUNDATION COURSE, DEVON, MAY 25, 2007

Fantastic – Can't wait to get started!

Clearly explained the principles and could be very beneficial if followed through and beyond into KS2.

Very interesting and informative. A lot of information to absorb probably much easier in practice.

Very interesting and thought provoking day. Enjoyed ideas & activities and advice on how to apply in class for different age groups, stages and abilities. Lots of potential to improve overall literacy skills.

It was very interesting and very informative and useful.

It was very useful, thank you.

Enjoyed the day – found that ICT software most interesting for use in year 6. Lots of possibilities.

An interesting day and I now have lots of ideas that I can use in the classroom.

The course was very interesting and informative. We were shown good resources to use but more time needed to fit into timetable including other phonic material.

The course was very informative. Good resources. More time needed to year group discuss. Less block time sat down listening? A couple more games to play would have been good! On the whole very good.

Good ideas with card games. A lot to take in but good delivery. Bright & clear teaching resources.

Enthusiastic delivery – good teaching resources.

A well presented course with a lot of good information to take in and use within the school. If we can follow this up as a staff to decide what to cover in each year group – super. Keen to use software etc.

A very detailed and informative day. Lots to learn – and lots to use. Will get started as soon as I can.

A very useful and enjoyable course.

Inspired by new ideas and resources. Much more for years 5 & 6 this time. Love the card games.

Interesting to see how THRASS has moved on since I attended 3-4 years ago. I feel that it's present format will be much more useful and I can see how this can be used more effectively across the school.

Lots of interesting and useful ideas which I am keen to use in the classroom. The day brought together a range of strategies into a structure that looks manageable to follow.

Got some good ideas from this course. A few things I hadn't thought of.

Very interesting and certainly very helpful in showing children a solid way of learning.

Very interesting. Will be very useful when up and running.

A very positive learning experience.

Enjoyable, informative and useful course. Looking forward to discussing how we will implement what we've learnt in the classroom, in planning. Lots of great resources and ideas.

Thoroughly enjoyed the presentation – informative, fun and interesting – lovely to meet Hilary. Really enjoyable – a hard task on the last day of term. Was useful and concise showing full range of scheme. Questions answered clearly and explained fully.
